## Pain Points & Future Trends

# An app built for the future of cycling

01

## Cycling as a lifestyle

Cycling has evolved from a mere mode of transportation to a full-fledged lifestyle. People are increasingly embracing it for its health benefits, environmental friendliness, and the sheer joy of riding.

02

## The rise of e-bikes

E-bikes are gaining popularity globally. They offer a smarter and more meaningful cycling experience, making it easier for people of all fitness levels to enjoy cycling.

03

## The need for a connected platform

With the growing number of cyclists, there is a clear need for a platform that connects data, community, and motivation. E-Bike Milestone was created to fulfill this need.

## APP Demo

# The ultimate riding experience

## Connects journey, community, and achievement

E-Bike Milestone brings together your cycling journey, the community of riders, and your personal achievements. It creates a holistic experience.

## Track your rides

The app allows you to track your rides in detail. You can see your routes, distances, speeds, and other important metrics.

## Join challenges and discover events

You can join various challenges to push your limits and discover local cycling events to participate in and meet other riders.

## Earn points and unlock rewards

By completing rides and challenges, you earn points that can be redeemed for rewards. This motivates you to ride more and achieve more.

# APP Demo link

For a more detailed demonstration of the app, visit the link provided. It will give you a comprehensive understanding of the features and functionalities.

## Challenge

# Technical issues(internal)

## Internal technical issues

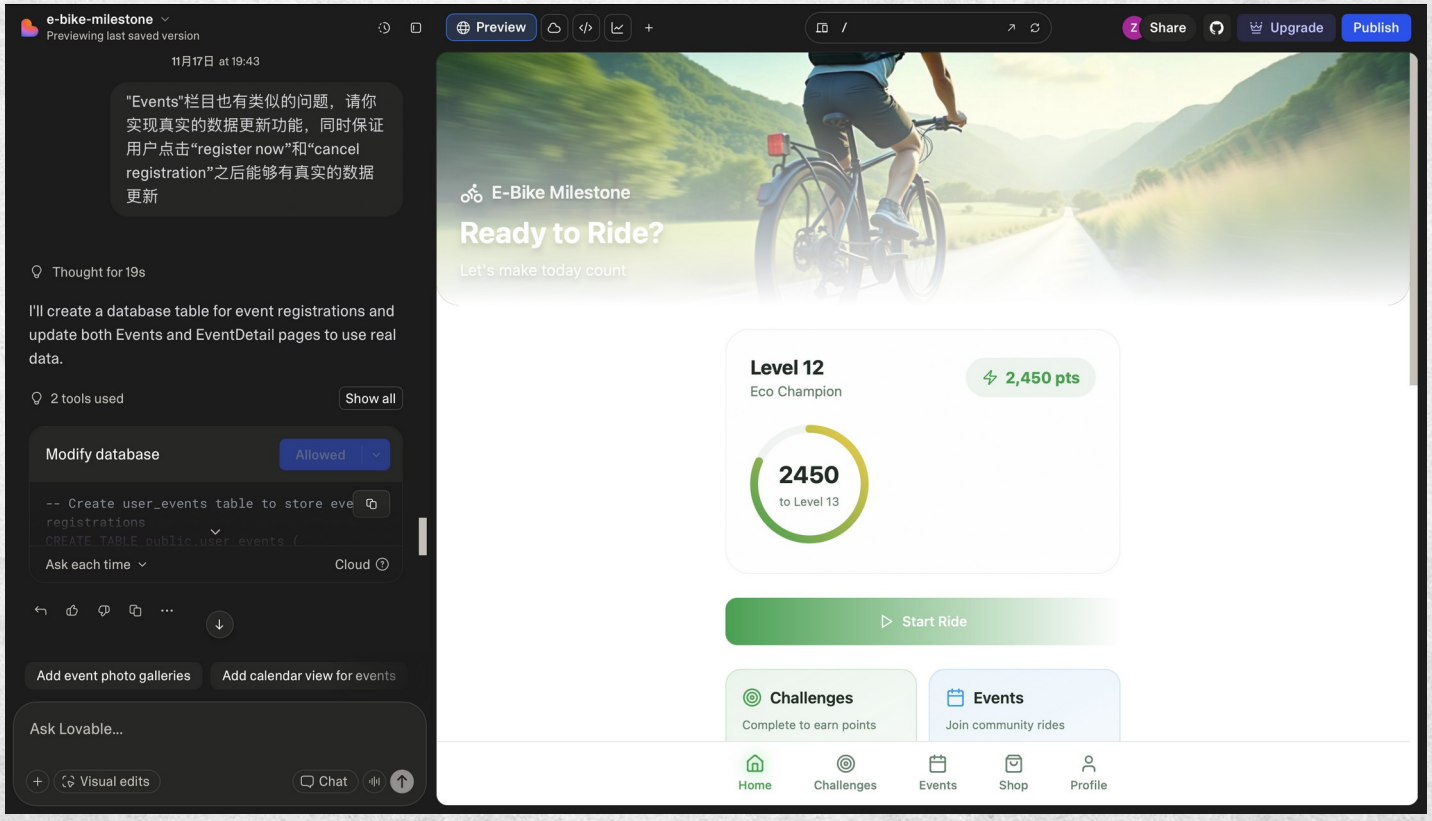

During the development process, we encountered some internal technical issues. These challenges tested our problem-solving skills and resilience.

# Limitations of Tools(external)

## External tool limitations

We also faced limitations with the tools we used. This required us to adapt and find alternative solutions to keep the project moving forward.

# »»» 06 «««

## Summary

# Summary

1.understanding of many development tools

2.experiencing the entire process of app development.

3.improving our communication skills with AI

4.developing our ability to collaborate and divide tasks within the team
